Portfolio: <https://onisodumeya.vercel.app> **GitHub:** <https://github.com/onisodumeya>

SUMMARY

Frontend Developer specializing in **React, TypeScript, and modern JavaScript frameworks**, with production experience in a **remote SaaS environment**. Skilled at building responsive, scalable interfaces and translating complex product requirements into clean, maintainable UI architecture.

Delivered user-facing features across collaborative engineering teams, led small development projects, and independently shipped production-ready applications—including a **full-featured business dashboard designed for Nigerian SMEs**. Particularly interested in building **data-driven products, developer tools, and high-quality user experiences for global remote teams**.

CERTIFICATIONS

NSQ Level 3 – Frontend Web Development

Computer Professionals (Registration Council of Nigeria) – CPN

Issued: November 3, 2025

Credential ID: CPN/NSQ/24121763

Verification: <https://nsq.cpn.gov.ng/verify>

- Government-recognized national qualification awarded by the statutory body established under **Act No. 49 of 1993**.
- Training completed through **Hovah West African Services Ltd & Adele Empowerment Foundation (Consortium)**.
- Coursework included:
 - HTML (HyperText Markup Language)
 - CSS (Cascading Style Sheets)

- JavaScript
- Version Control with Git
- Responsive Web Design
- Bootstrap Fundamentals
- UI/UX Design Principles
- Modern Frontend Frameworks
- Content Management Systems (CMS)
- Product Management
- IT Ethics, Communication & Workplace Skills

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, Vue 3, Nuxt.js, Next.js

Frontend Development: HTML5, CSS3, Tailwind CSS, Bootstrap, GSAP

State & Data: Pinia, REST APIs, Asynchronous Data Handling

Tools & Workflow: Git, GitHub, Figma, Agile/Scrum, Remote Collaboration (Slack)

Backend (Basic): Node.js, PostgreSQL

AI Tools: GitHub Copilot, ChatGPT, OpenAI APIs

EXPERIENCE

Junior Frontend Developer

Jodna Technologies — Remote

Mar 2025 – Jan 2026

Worked in a distributed SaaS team developing responsive web applications and scalable UI systems using modern frontend frameworks.

- Built and maintained responsive web applications using **Vue 3, Nuxt, React, and Tailwind CSS** across multiple product features.

- Translated **Figma product designs into reusable, accessible UI components**, improving development consistency across pages.
- Developed scalable component systems and modal architectures reused across **10+ application views**.
- Integrated frontend features with **REST APIs**, implementing loading states, error handling, and fallback UI patterns.
- Improved user experience through **mobile-first layouts, conditional rendering, and UI performance optimizations**.
- Led a small project team from concept to delivery, coordinating development tasks and maintaining timelines.
- Collaborated daily with designers and backend engineers in an **Agile remote development workflow**.

Transition:

Stepped down to focus on **independent projects and advanced frontend upskilling**, including building production-ready applications and expanding expertise in React, TypeScript, and modern UI systems.

Key Project: Movie Rental & Streaming Platform

Vue 3 • Nuxt • Pinia • TypeScript • Tailwind CSS • Node.js

- Developed the **main layout and homepage experience** with a Netflix-style interface and dynamic poster interactions.
- Implemented reusable components and **centralized state management using Pinia**.
- Built responsive UI structures optimized for **desktop, tablet, and mobile viewing**.
- Integrated dynamic content rendering with API-driven movie data.

PORTFOLIO WEBSITE

Personal Portfolio – Frontend Developer Showcase

onisodumeya.vercel.app

- Designed and developed a responsive personal portfolio to showcase frontend projects and skills.
- Implemented modern UI patterns, animations, and smooth interactions.
- Highlighted real-world projects built with React, Vue, Nuxt, and Tailwind CSS.
- Optimized performance, accessibility, and mobile responsiveness.
- Deployed and maintained using modern hosting workflows.

EDUCATION

B.Sc. Computer Science (In Progress)

Ignatius Ajuru University of Education

Expected Graduation: 2028

Hovah Adele Empowerment & IGF Digital Training Program

Frontend Development Track

- Hands-on training in JavaScript, React, Vue, and UI/UX best practices
- Completed collaborative, real-world project simulations

PORTFOLIO

E-Commerce Admin Dashboard

React 18 • TypeScript • Tailwind CSS • Recharts • Vite

Live: e-commerce-dashboard-lovat.vercel.app

GitHub: github.com/onisodumeya/e-commerce-dashboard

A full-featured business management dashboard designed for **Nigerian SMEs to manage e-commerce operations**.

- Product management system with **full CRUD functionality**
- Sales tracking dashboard with **transaction history and status management**
- Interactive revenue analytics with **dynamic time filtering and data visualizations**
- Context API-based **dark/light theme system**

- Protected routes and authentication helpers
- LocalStorage persistence for offline-friendly data handling
- Fully responsive across **mobile, tablet, and desktop**

Developer Portfolio Website

Nuxt.js, Vue, TypeScript, Tailwind CSS

Live: onisodumeya.vercel.app ·

GitHub: github.com/onisodumeya/Portfolio

A personal developer portfolio showcasing projects, skills, and professional background as a frontend developer. Built with Nuxt.js for server-side rendering and optimised performance, styled with Tailwind CSS, and featuring smooth animations and a clean, responsive layout across all screen sizes.

Plumbing Services Website

Nuxt.js, Vue, TypeScript, Tailwind CSS

Live: plumbing-website-gilt.vercel.app ·

GitHub: github.com/onisodumeya/plumbing-website

A professional multi-page business website built for a local plumbing company, demonstrating real-world client-facing frontend development. The site features dedicated service pages for Emergency Plumbing, Drain Cleaning, Leak Repairs, and Water Heater Installation, a testimonials section, a service area map covering multiple locations, a contact form, and clear calls-to-action throughout. Built with Nuxt.js for optimised routing and performance, styled with Tailwind CSS, and fully responsive across all screen sizes.
